

Table of Contents

Chapter 1: INTRODUCTION TO RESEARCH	1
Behavioral Research	1
Common Sense Observations and Scientific Research.....	2
Relying on our Common Sense	2
What are the Limitations of Common Sense?	2
The Scientific Method.....	4
Values and Opinions Versus Facts in Scientific Research	5
Basic and Applied Research	6
Why Should I Study Research Methods?	6
Learning to Make Good Personal Decisions	6
Critically Evaluating Research Reports.....	7
So You Can Conduct Your Own Research.....	8
Three Broad Approaches to Studying Behavior	8
Descriptive Research: Summarizing Behavior	8
Correlational Research: Do Relationships Exist Between Variables?.....	9
Experimental Research: Show Me the Causation.....	10
Summary	11
Key Terms (with page numbers where these terms can be found)	11
References.....	12
Chapter 2: DEVELOPING THE RESEARCH HYPOTHESIS	13
Getting Ideas	13
Solving Real World Problems	13
Using Observation and Intuition	13
Building on Existing Research	14
Searching Through the Literature	16
Locating Good Sources.....	16
Conducting the Search.....	16
Developing an Idea into a Research Hypothesis.....	17
Replications	17
Theories	17
The Research Hypothesis.....	19
The Role of Ethics in Research.....	20
Ethical Treatment of Human Participants.....	20
Is Deception Justified?.....	21
Are Research Animals Routinely Mistreated?.....	22
The Ethics of Communicating With the Public.....	23
Summary	24
Key Terms (with page numbers where these terms can be found)	25
References.....	25
Chapter 3: MEASURES	27
Fundamentals of Measurement	27
Operational Definitions.....	27
Converging Operations	28
Nominal and Quantitative Measures.....	29
Measurement Scales	29
Self-Report Measures	30
Open-Ended Self-Report Measures	30
Closed-Ended Self-Report Measures.....	31
Guidelines for Writing Items	32
The Problem of Reactivity	34

Behavioral Measures	35
Nonreactive Measures	36
Psychophysiological Measures	36
Choosing a Measure	36
Summary	37
Key Terms (with page numbers where these terms can be found)	38
References	38
Chapter 4: RELIABILITY AND VALIDITY	39
Random and Systematic Error.....	39
Reliability.....	40
Test-retest Reliability.....	40
Equivalent Forms Reliability	41
Internal Consistency Reliability.....	42
Interrater Reliability.....	43
Construct Validity	44
Face Validity	44
Content validity.....	45
Convergent and Discriminant Validity	45
Criterion Validity	45
How to Improve the Reliability and Validity of Measured Variables	46
Exploring the Relationship between Reliability and Validity.....	48
Summary	49
Key Terms: (with page numbers where these terms can be found)	49
References	50
Chapter 5: SURVEYS AND SAMPLING	51
Surveys.....	51
Interviews.....	51
Questionnaires.....	52
Use of Existing Data	53
Sampling and Generalization	53
Samples and Populations	53
Probability sampling	54
Sampling Bias and Nonprobability Sampling.....	55
Summarizing the Sample Data.....	55
Frequency Distributions.....	55
Descriptive Statistics.....	57
Sample Size and Margin of Error	59
Summary	60
Key Terms: (with page numbers where these terms can be found)	61
References	61
Resources	61
Chapter 6: NATURALISTIC METHODS	63
Naturalistic and Observational Research	63
The Covert Observer or Participant	64
The Overt Observer or Participant	66
Case Studies	67
Systematic Coding Methods.....	68
Archival Research	69
Summary	71
Key Terms (with page numbers where these terms can be found)	72
References	72

Chapter 7: HYPOTHESIS TESTING AND INFERENTIAL STATISTICS	73
Probability and Inferential Statistics	73
Sampling Distributions	75
Hypothesis Testing	76
Step One - The Null Hypothesis	76
Step Two - The Alternative Hypothesis	76
Step Three – Select Alpha Level	77
Step Four – Obtain Data	77
Step Five – Calculate an Inferential Statistic	77
Step Six - Calculate p-value and Compare to Alpha	77
Step Seven –Accept or Reject Null Hypothesis	77
Reducing Inferential Errors	78
Type 1 Errors	78
Type 2 Errors	78
Statistical Power	79
The Balance Between Type 1 and Type 2 Errors	79
Statistical Significance and Effect Size	79
Practical Use of the Effect Size Statistic	79
Summary	80
Key Terms (with page numbers where these terms can be found)	80
References	80
Chapter 8: CORRELATIONAL RESEARCH DESIGNS	81
Associations Among Quantitative Variables	81
Linear Relationships	82
Nonlinear Relationships	82
Statistical Assessment of Relationships	83
Pearson Correlation Coefficient	83
Chi-Square Statistic	85
Multiple Regression	86
Correlation and Causation	87
Interpreting Correlations	87
Using Correlational Data to Test Causal Models	88
When Correlational Designs Are Appropriate	89
Summary	89
Key Terms (with page numbers where these terms can be found)	90
References	90
Chapter 9: EXPERIMENTAL RESEARCH: ONE-WAY DESIGNS	91
Demonstrating Causality	91
Association	92
Temporal Priority	92
Elimination of Alternative Explanations	92
One-Way Experimental Designs	93
Manipulating the Independent Variable	94
Selecting the Dependent Variable	96
Adding a Pretest	96
Repeated Measures Designs	97
Advantages and Disadvantages of a Repeated Measures Design	97
When Not to Use a Repeated Measures Design	99
Analysis of Variance	100
Hypothesis Testing in an Experimental Design	100
Between-Groups and Within-Groups Variance	100
ANOVA Summary Table	101

When Experiments are Appropriate	102
Summary	103
Key Terms (with page numbers where these terms can be found)	103
References	104
Chapter 10: EXPERIMENTAL RESEARCH: FACTORIAL DESIGNS	105
Factorial Experimental Designs	105
Possible Outcomes of a Factorial Design.....	107
Main Effects	107
Understanding Interactions	108
Interpreting Main Effects when Interactions are Present	109
Statistical Testing in Factorial Designs	109
Factorial Designs Using Repeated Measures	110
Repeated Measures Factorial Design.....	110
Mixed Factorial Design.....	111
Designs with More than Two Independent Variables.....	111
Three- and Four-way Designs.....	111
Including Non-manipulated Variables	112
Summary	112
Key Terms (with page numbers where these terms can be found)	113
Reference.....	113
Chapter 11: EXPERIMENTAL CONTROL AND THREATS TO VALIDITY	115
Threats to the Validity of Research.....	115
Experimental Control	116
Extraneous variables	116
Confounding variables	117
Controlling Extraneous Variables	117
Limited-population Designs.....	118
Pretest-Posttest Designs	118
Matched-group Designs	119
Standardization of Conditions.....	119
Creating Valid Manipulations	120
Impact and Experimental Realism	120
Manipulation Checks	120
Turning Confounding Variables into Independent Variables	121
Pilot Testing	121
Threats to Internal Validity	121
Placebo Effects.....	122
Demand Characteristics	122
Experimenter Bias.....	123
Random Assignment Artifacts.....	123
Threats to External Validity	124
Generalization across Participants and Settings.....	124
Replications (Exact, Conceptual, Constructive, Participant).....	124
Summarizing and Integrating Research Results.....	125
Research Programs.....	125
Review Papers.....	125
Meta-analysis	125
Interpreting Research Literature	126
Summary	126
Key Terms (with page numbers where these terms can be found)	127
References	127
Chapter 12: QUASI-EXPERIMENTAL RESEARCH DESIGNS	129

Program Evaluation Research	129
Quasi-Experimental Designs.....	130
Single Group Design.....	130
Single Group Before- and- after Design	131
Regression to the Mean as a Threat to Internal Validity	131
Non-equivalent Comparison Before- and- after Group Design.....	132
Time Series Designs.....	132
Participant-Variable Designs	133
Demographic Variables	133
Personality Variables	133
Interpretational Problems.....	134
Single-Participant Designs.....	134
A-B Design	134
A-B-A Design	134
A-B-A-B Design	135
Summary	136
Key Terms (with page numbers where these terms can be found)	137
References.....	137
Online resources:.....	137
Chapter 13: REPORTING RESEARCH RESULTS	139
The Importance of Communicating Scientific Results	139
The Research Report.....	139
Title Page	140
Abstract.....	140
Introduction.....	141
Method	142
Results.....	143
Discussion	144
References.....	144
Appendix and Footnotes	145
Tips on Writing a Research Report.....	145
Summary	146
Key Terms (with page numbers where these terms can be found)	146
References.....	146
APPENDIX - PREPARING AND WORKING WITH DATA.....	147
Preparing Data for Analysis	147
Coding.....	147
Dealing with missing data.....	147
Deleting Data	148
Using Excel for Behavioral Statistics	148
Entering Data using Excel	148
Computing Descriptive Statistics in Excel 2007	149
Computing Inferential Statistics with Excel.....	150
Using SPSS for Behavioral Statistics.....	151
Entering Data using SPSS	151
Computing Descriptive Statistics in SPSS.....	152
Computing Inferential Statistics with SPSS	152
Summary	160
Key Terms (with page numbers where these terms can be found)	160
References.....	160
